espazium.ch – the online portal of The Publisher for Building Culture

espazium.ch is the interdisciplinary and independent platform for dialogue on building culture in Switzerland. The online portal of espazium – The Publisher for Building Culture is the only trilingual website in Switzerland that reports on topics from the fields of architecture, engineering, environment and related disciplines.

Specialist articles and news reports from the construction industry, along with digital feature dossiers and a Switzerland-wide job market, are available on espazium.ch.

On competitions.espazium.ch, the online editorial team publishes current invitations to tender and the results of past competitions – a much appreciated tool for all construction professionals.

Education.espazium.ch promotes courses, training programs in the field of construction, and the latest updates from Swiss universities.

In events.espazium.ch, our building culture agenda, espazium.ch publishes all important events in Switzerland and neighboring countries in cooperation with the Swiss Association of Engineers and Architects SIA and the Federal Office for Culture BAK.

Edu-Push: Focus on education

Present your training courses on [espazium.ch](https://www.espazium.ch) and benefit from the reach of Switzerland's leading digital platform for building culture!

«Edu-Push» assures maximum visibility for all your products and services in training and continuing education. You also benefit from our network and community, home to a multitude of construction professionals – your potential students.

1 – Paid Content Article in the E-Dossier

«Man muss den Wert des „Alten“ vermitteln können»

RICHER HOCHSCHULE FÜR ANGEWANDTE WISSENSCHAFTEN – ZHAW

ARCHITECTUR | DENKMALSCHUTZ, KONSERVIERUNG UND RESTAURIERUNG

KLIMA, ÖKOLOGIE, ENERGIE UND NACHHALTIGKEIT

Heidi Content | Publish: 01. April 2025

Nachhaltiges Bauen beginnt beim Bestand: Wer Ressourcen schonen und Graue Energie erhalten will, braucht ein tiefes Verständnis für die Besonderheiten bestehender Gebäude und die oft widersprüchlichen Anforderungen aus Denkmalpflege, Konstruktion, Ökonomie und Energie. Gleichzeitig fordert die Klimakrise neue Wege im Entwerfen und Konstruieren – praxisonah, fundiert und über bestehende Normen hinaus.

Das neue **CAS Weiterbauen im Bestand** wurde erst gerade lanciert, eine erste Durchführung startet im September 2025.

Welche Herausforderungen oder neuen Kompetenzanforderungen haben aus deiner Sicht die Entwicklung genau dieses CAS notwendig gemacht?

Der Bestand ist eine wichtige Ressource, wenn es darum geht, Emissionen zu minimieren, Energie zu sparen und Abfall zu vermeiden. Der Bestand hat auch einen grossen baukulturellen Wert, der uns als Gesellschaft prägt. In den letzten Jahrzehnten lag der Fokus auf Ersatzneubauten, was in den meisten Fällen einem Verlust grosser materieller, sozialer und baukultureller Ressourcen gleichkommt. Wir müssen den Umgang mit dem Bestand, das Weiterbauen, erst wieder erlernen.

Die Schwierigkeit beim Bauen im Bestand liegt einerseits darin, dass jedes Gebäude anders ist und wir keine Rezepte im Umgang damit haben, andererseits, dass die Interessen und Perspektiven – sei es unter dem Gesichtspunkt der Energie, Ökonomie oder Denkmalpflege – sehr unterschiedlich und oft auch konfliktuell sind.

Wir brauchen neue Bestandesspezialist:innen, die souverän mit diesen Herausforderungen umgehen – und genau hier setzt das neue CAS an.

Franziska Egloff: Inwiefern wird das Weiterbauen im Bestand angesichts von Klimakrise und Ressourcenknappheit zu einem zentralen Ansatz für die zukünftige Entwicklung des Bauwesens?

Specifications for the five different entries in your Edu-Push package

- 1 article on continuing education or interview with a programme director, published in the «Education» e-dossier
 - 4,000 characters inc. spaces
 - 1-2 photos or video

espazium magazin – Swiss Construction Review

espazium magazin has been the leading construction magazine for German-speaking Switzerland since 1874. The specialist editorial team sheds light on future-relevant issues, reports in a critical and insightful way, recognises new developments, identifies causal relationships and investigates background stories.

Planning, architecture and engineering offices use espazium magazin as an indispensable working tool for practice. It is the only interdisciplinary construction review dealing with topics from the fields of architecture, engineering and the environment.

With its expert articles, competition announcements and job vacancies, espazium magazin is always right up-to-date.

The editorial team is made up of 100% construction professionals.

Media quality

The leading technical-scientific construction review in German-speaking Switzerland

The only Swiss construction review covering all construction-related topics

Market leader with 13,100 copies

Official review of the Swiss Society of Engineers and Architects (SIA)

A must-read for all planners (architectural and engineering offices in German-speaking Switzerland)

Documentation tool that is archived for reference

Cross-media link with espazium.ch

espazium revue – Construction review for French-speaking Switzerland

espazium revue sets the tone

espazium revue is known for its very high editorial quality. With its editorials, the magazine positions itself in the public debate.

- Since 2020, the graphic layout and the iconic covers designed by Automatico Studio have caught the eye.
- Since 2022, espazium revue has had its finger on the pulse with the «En chantier» and «En visite» sections, giving professionals a voice, including on social networks.
- Since 2023, espazium revue has been working with the magazine «T», which is distributed by Le Temps, to reach the general public.
- Almost all award-winning projects from French-speaking Switzerland (DRA5, Arc Award, SIA Prize or «The Best») were first published in espazium revue.

Media quality

Leading technical-scientific construction review in French-speaking Switzerland

Market leader in French-speaking Switzerland with 4,700 copies

Official trade review of the Swiss Society of Engineers and Architects SIA

A must-read for all planners (architectural and engineering offices in French-speaking Switzerland)

Documentation tool that is archived for reference

Language: French

A new beginning after 150 years

After two world wars and a pandemic, the title is still going strong and has reached the venerable age of 150 years in 2025. The magazine has had several names: Bulletin technique, IAS, TRACÉS, etc. With the further development of the publishing house, the magazine was simply renamed espazium revue and is now an integral part of espazium's range of services and publications, alongside the platforms (competition, education, events) and the Italian- and German-language magazines.

Readership

Architects, interior designers, planners, engineers, property developers, project managers, authorities, universities, building technicians, building physicists, environment, energy professionals, decision-makers and influencers in the building sector

High level of education and income (degree from university, ETH and university of applied science)

Print run and circulation

Distributed circulation: 4,399 copies

Of which paid copies: 4,073 copies

(WEMF/KS certification 2025)

11 issues per year + special editions

TRACÉS → espazium ≡ revue

espazium quaderni – Swiss review for building and planning culture

espazium quaderni is the only specialist review for planners in Italian-speaking Switzerland. As the successor to Rivista Tecnica, which was founded in 1910, and Archi, espazium quaderni has been providing architects, engineers, and urban planners with knowledge and services at local, national, and international levels.

espazium quaderni is a landmark among Swiss architectural reviews and is also highly regarded in Italy for its prestigious «Classe A» classification in scientific circles.

The editorial team is made up exclusively of renowned professionals and academics, focusing on disseminating the values of building culture and acting as a link between Central-European and Mediterranean cultures.

Media quality

Leading technical-scientific construction review in Italian-speaking Switzerland

Market leader in Italian-speaking Switzerland with around 3,500 copies

Official trade review of the Swiss Society of Engineers and Architects SIA as well as CAT, Conferenza delle Associazioni Tecniche del Cantone Ticino

A must-read for all planners (Architecture and engineering offices in Ticino and the Italian-speaking areas of Graubünden)

Documentation tool that is archived for reference

Cross-media link with espazium.ch and social media

Published since 1910

Language: Italian/English

Readership

Architects, planners, engineers, property developers, project managers, authorities, universities, building technicians, building physicists, environment, energy professionals, decision-makers and influencers in the building sector

High level of education and income (degree from university, ETH and university of applied science)

Print run and circulation

Distributed circulation: 3,056 copies

Of which paid copies: 2,894 copies
(WEMF/KS certification 2025)

6 issues per year + special editions
